GraphQL	Neo4J	PowerBI

PROFESSIONAL EXPERIENCE

Elizabeth Glaser Paediatrics Aids Foundation   **August 2022 - May 2023**
Health Informatics Contract
I played a crucial role in supporting the CCA (Catalytic Covid Action) project in Kiambu County. Specifically, focusing on training and providing ongoing support to healthcare workers in the treatment of infectious diseases, with a particular emphasis on Covid-19.

My responsibilities included:
- Training healthcare workers on the effective utilization of technology for the treatment, recording, and follow-up of patients diagnosed with infectious diseases, particularly Covid-19.
- Collaborating closely with healthcare teams to identify areas where technology could enhance patient care and streamline workflows.
- Assisting in the implementation and integration of digital health solutions, such as electronic health records and telemedicine platforms, to facilitate efficient and accurate data collection and reporting.
- Providing ongoing technical support and troubleshooting to healthcare workers, ensuring seamless and uninterrupted usage of technology during patient care.
- Conducting regular assessments and evaluations to identify opportunities for process improvement and optimize the use of technology in treating infectious diseases.

Accomplishments:
- Developed and implemented an efficient Standard Operating Procedures (SOP) platform, streamlining organizational workflow and ensuring compliance with regulatory requirements.
- Developed a Vehicle Management Platform to monitor programmatic vehicle destinations, its passengers, trips it makes on a daily basis to allow for effective planning and reporting

Freelance Web Developer, Upwork   **Jan-2022 - present**
